The IEEE Computer Society's Technical Community on Multiple-Valued Logic will hold its 55th annual symposium in Montreal, Quebec, Canada, on June 5 – 6, 2025. ISMVL 2025 offers you a great opportunity to follow recent technologies and explore future directions in multiple-valued logic and its related areas.

The following keynote speakers will present their cutting-edge research results:

- **Prof. Benoit Larose** (University of Quebec in Montreal, CANADA)
TBD
- **Prof. Zeljko Zilic** (McGill University, CANADA)
Contributions of K. C. Smith in Applications of MVL
- **Prof. Jacob Biamonte** (University of Quebec in Montreal, CANADA)
TBD

Technical (Regular) Papers:

Other than the keynote addresses, 41 high-quality papers will be presented as well. The program will be available at <https://mvl.jp.org/ISMVL2025/program.php>

Social Program: The social program will include a Welcome Reception on June 4, and banquet on June 5.

Accompanying Workshops:

In conjunction with ISMVL 2023, [the 34th International Workshop on Post-Binary ULSI Systems](#) (June 4) and [the Reed-Muller 2025 Workshop](#) (June 4) will be held at the same location.

Registration:

All participants are required to register. The deadline for early registration is April 27, 2025. Details about registration such as registration fee and how to register are available at: <https://mvl.jp.org/ISMVL2025/registration.php>
